1 [Generating hypermedia from specifications by sketching multimedia templates](#) 
 S. Fraïssé, J. Nanard, M. Nanard
 February 1997 **Proceedings of the fourth ACM international conference on Multimedia**
 Publisher: ACM Press
 Full text available: .pdf(1.42 MB) Additional Information: full citation, references, citations, index terms

Keywords: executable specification, hypermedia design, hypermedia generation, multimedia template, object-oriented

2 [Invariants come from templates](#) 
 Joni Helin, Pertti Kellomäki
 September 2005 **Proceedings of the 10th international workshop on Formal methods for industrial critical systems FMICS '05**
 Publisher: ACM Press
 Full text available: .pdf(207.71 KB) Additional Information: full citation, abstract, references, index terms

We present a template mechanism which allows collective behavior and its invariants to be expressed in an abstract form. The mechanism supplements a view-based decomposition of distributed collaboration. Together templates and composition allow common idioms of distributed behavior to be specified and verified in an abstract form, and to be integrated in specifications. Two templates from a formal specification of Lamport's Paxos algorithm are given as examples.

Keywords: closed world views, collective behaviour, distributed systems, invariants, templates

3 [Empirical studies: Beyond templates: a study of clones in the STL and some general implications](#)
